Overview: CTE can only be definitively diagnosed through postmortem examination. Nonetheless, living patients need assistance and the symptoms of suspected CTE can be managed in a clinical setting. Join this webinar with Jesse Mez, MD and Michael Alosco, PhD of the Boston University Memory and Aging Clinical discuss the interdisciplinary clinical approach to patients at risk for CTE.

Covered Content:
- Use of neuropsychology & biomarkers for neurodegenerative disease diagnosis
- Diagnostic updates in CTE
- Deep-dive into a memory and aging clinic patient visit

Learn More: ConcussionFoundation.org/CME
The Concussion Legacy Foundation is a 501(c)(3) nonprofit organization based in the United States with chapters in Australia, Canada and the United Kingdom. It was founded by Robert Cantu, MD, and Chris Nowinski, PhD to support athletes, veterans and all affected by concussions and CTE to promote smarter sports and safer athletes through education and innovation and End CTE through prevention and research. CLF is a proud supporter of and collaborator with the Boston University CTE Center. The Concussion Legacy Foundation’s work has been featured by the New York Times, Rolling Stone, TIME, Sports Illustrated, ESPN, BBC, PBS, HBO Real Sports and many other news and media outlets.
