# **Supporting** Suspected CTE Caregivers

Being the caregiver for a loved one with suspected CTE can be an incredible challenge. You may spend so much time caring for your loved one, you neglect your own needs. **Below are a few tips to support your caregiving journey.** 

# Look after yourself first

- Setting aside time for self-care is an essential part of being a supportive caregiver.
- Put your own healthcare needs first and reach out if you need help.
- Prioritize activities that build your physical, emotional, mental and spiritual energy such as:

# Meditation Regular exercise Mindfulness Reading Listening to music Cooking Proper rest Healthy diet Being Social

## **Create a support network**

- It is important to build a strong and empathetic network of people who can support you and your loved one. You are not alone.
- Talk to a sibling, friend, parent, or therapist.
- Be open about your experiences with those who many not see your loved one at their worst.
- The CLF Mentorship program is a great way to connect to a fellow suspected CTE caregiver.

Reach out to the CLF HelpLine at <u>CLFHelpLine.org</u> to find a peer support volunteer to lean on for support.
